Clinton River, MI

Project Features
➢ River starts in Oakland County, MI; it flows east about 60 miles and empties into Anchor Bay in the northwest part of Lake St. Clair.
➢ Authorization: River & Harbor Act of 5 Aug 1886, modified under Section 107 River & Harbor Act of 1960.
➢ Shallow draft recreational harbor.
➢ Project depth is 8 feet.
➢ Approximately 8 miles of maintained Federal channel.
➢ Approximately 1,500 feet of breakwater.
➢ The Clinton River Confined Disposal Facility was placed in operation in the 1990s and is anticipated to have sufficient capacity for at least the next 25 years.
➢ Major stakeholders include the Michigan DNR, the City of Mount Clemens, and various marina owners and private boaters.

Project Needs
➢ Requires periodic maintenance dredging on a three to five year cycle of approximately 20,000 cubic yards; the river was last dredged in 2008.
➢ Navigation structures are primarily maintained by Government floating plant.

Consequences of Not Maintaining the Project
➢ Loss of jobs locally.
➢ Loss of recreational and charter fishing in the area.

Transportation Importance
➢ This project serves as an important Harbor of Refuge and supports charter fishing and recreational navigation interests.
➢ The local community has established a significant infrastructure around the harbor facilities that generates income from harbor users and visitors to the area.
